

Looking Ahead

This is the last in a series of articles on energy by Harry Davitian, National Center for Analysis of Energy Systems.

For at least the next decade, U.S. energy consumers face still higher prices and the continued possibility of supply disruptions. This bleak assessment is based on underlying, irreversible trends in our energy resource use patterns.

For most of this century, the U.S. experienced a golden age in its use of energy. Large quantities of petroleum and natural gas were discovered and quickly exploited. Now, production from these high quality resources is declining. In contrast to these easy to extract, easy to use, relatively benign resources, we must now rely increasingly on coal, uranium, oil shale, and renewable (i.e. solar, geothermal, wind, and waste) resources.

It is much more costly to convert these resources into energy forms that are easy to use, and their extraction and conversion (especially of the non-renewable ones) tend to have unpleasant side effects.

National malaise

Building new energy supply facilities that rely on these more plentiful resources will take decades and require massive capital investments. In the meantime, we have allowed ourselves to become dangerously dependent on imports. The balance between our energy supplies and demands remains subject to the stability and the whims of the leadership of a few foreign countries, some of which have no basic economic need for their huge oil revenues.

The Iranian revolution, which halved the oil production of OPEC's second largest producer, and the recent fundamentalist insurrection in Saudi Arabia, the world's leading oil producer, demonstrate the fragility of that balance.

We seem to be suffering from a national malaise regarding our energy situation. Until recently, polls indicated that the American public did not believe the problem

was serious. Many seem to think that shortages and increasing prices are simply the consequences of an immense oil company plot. Oil company machinations are undoubtedly a reality, just as they have been for most of the last century. However, to argue that oil companies are not just exploiting the situation, but actually are themselves the problem, is delusory. Insofar as such beliefs delay serious efforts to deal with our energy problems, they are harmful to all of us.

Change will need encouragement

Much of the technology for using energy more efficiently exists and can be economically justified. Houses, commercial buildings, cars, appliances, and industrial equipment requiring only a fraction of the energy needed by those currently in use have already been demonstrated. In many cases, 50 percent reductions in energy consumption are easy to achieve. In some cases, as much as 80 percent can be cut. The problem now is to get consumers to demand the very best in energy efficient performance.

To demonstrate just how far we have to go, consider that builders on Long Island still build, and consumers still buy, houses with only three and one half inches of insulation in the walls, six inches in the attic, with no polyethylene vapor barrier, with inefficient heating systems, and with no consideration given to passive solar design concepts. These energy-wasteful building practices have already been abandoned in many parts of the country. Yet questioning home buyers are frequently told that it is just too difficult and expensive to convert from past techniques to more modern energy (and money) saving designs.

This type of situation is unacceptable if we are to begin to take control of our energy future rather than continue to leave it in the hands of a few distant countries and a few large energy companies. When in the market for a new appliance, car, or

(Continued on page 2)

P.O. Richard Baulch and Capt. Bernard Doran are congratulated by Lab Director George Vineyard for their excellent performance during an unexpected incident on site. (See story below.) Police Supervisor Bernard Brennan (right) said both officers will receive exceptional merit awards.

Doug Humphrey

The Great Chase

Cops - robbers - a wild 45-minute chase - sirens screaming - a shot rings out! A scene from "The French Connection?" No. It all came down at the Laboratory around 1 a.m. on June 4.

Patrol Officer Beeler was on duty at the main gate presiding over the usual calm comings and goings, when, suddenly, two vehicles came barreling down the road and ran the red light into the Lab. As they zoomed past, the man in the second vehicle, a green Toyota, yelled at Beeler, "I'm a cop. Get the police."

Capt. Doran was at HQ when Beeler's call came in. He immediately assigned P.O. Rackett to barricade the gate, and for P.O. Baulch to get his patrol vehicle and join him in the pursuit.

The object of the chase was a brown Ford pickup, with a man driving and two standing in the rear. It proved to be an elusive quarry. The two patrol cars and the green Toyota sped all over the site in hot pursuit of the brown Ford. The two men in the rear of the pickup heaved objects at Doran and, at one point, the driver rammed the front of his car. For 45 minutes the wild chase continued, and the peace of the night was shattered by the wailing sirens, the flashing lights and the orders to "stop" blaring forth from the public address system.

The brown Ford screeched into the old dump site off Brookhaven Avenue, past the Recreation Park. Baulch blocked the entrance with his car and got out of the vehicle. As the pickup's driver realized he was hemmed in, he kept turning the car around and driving directly at Baulch.

Without losing his cool, the patrol officer pulled out his service revolver and fired one shot into the Ford's left front tire, bringing it to a standstill.

As Doran and Baulch nabbed the driver, the other two men jumped out the back of the truck and fled into the woods. Baulch took off after the fugitives, but was unable to find them. The Suffolk County Police had been notified and they arrived on the scene with five units, an emergency van and a police dog. They contin-

ued the search, with the aid of Lab patrol units, until dawn. The dog had picked up the scent of the men from the pickup truck, but lost it when the escapees apparently dropped back onto the paved roads.

The man in the green Toyota was an off-duty police officer who had been assaulted by the trio as he broke up a robbery in Middle Island. He was in pursuit of them when they veered into the Lab. He made the arrest of the man who was caught on site. At this writing, it is understood the other two men have been identified but are still at large.

On behalf of the Lab, a charge of criminal trespassing has been filed against the driver by Capt. Doran, and P.O. Baulch has charged him with reckless endangerment. The brown pickup has been impounded on site and will remain here until disposition of the case.

Both Doran and Baulch say they have had enough excitement for some time, and will be quite happy to return to routine.

Laboratory Security Officer, Bob Young, said this is the first time that there has been an incident of this kind on site, and that they were indeed proud of the "cool professionalism" exhibited by the Lab police.

Inside Info

In recognition of his research activities on dynamics of marine ecosystems, **John J. Walsh**, head of the Oceanographic Sciences Division (DEE), was recently awarded the Gold Medal of Science from the Université de Liege, Belgium. The medal was presented to Walsh at the Twelfth International Liege Colloquium on Ocean Hydrodynamics. Although approximately 20 medals have been given to physical scientists of the oceanographic community over the last 12 years, this was the first time a biologist had been so honored. At the same meeting, Dr. A. Aitsam of the Academy of Sciences of the Estonian S.S.R., Tallinn, U.S.S.R. was also awarded a Gold Medal for his research in the Baltic Sea.

County Chief Comes To Brookhaven

Doug Humphrey

Suffolk County Executive Peter Cohalan (left) talked to Gerald Dennehy, head of the Conservation Program Management Group, at the site of the Brookhaven House during a visit to the Laboratory on Monday. Hosted by Associate Director Vincent O'Leary (foreground), Cohalan received a briefing on the Laboratory's research and a day-long tour of its principal facilities. Cohalan took office in January as Suffolk County Executive, and this was his first visit to BNL.

Weekend Tour

Scientists in the Marshall Islands Radiological Safety Program will be doing this weekend's mini tour at the Safety and Environmental Protection Division. Visitors will see slides of the Marshall Islands, showing all aspects of the program. Analysis equipment will also be displayed.

In addition to the mini tour, the complete tour of the Lab includes a viewing of "Brookhaven's Quest," a guided bus tour of the site, and a visit to the Exhibit Center.

Equipment Display

A demonstration van from the Varian Industrial Equipment Group will be on site from 10 a.m. to 2:30 p.m. at the parking lot adjacent to the cafeteria. The equipment to be displayed includes portable leak detector, new direct drive mechanical pumps, ionization gauge controls, sputtering targets and evaporative metals, vacuum hardware, and smart gauge diagnostic control.

Energy

(Cont'd)

house, we can insist on one that incorporates the best in energy saving technology. In existing houses, we can cut back on our consumption by making investments in energy-saving equipment and alternate energy systems that are more in tune with the higher cost of conventional energy.

There is no question that we will have a very different energy system in the United States 30 years from now. Whether the process of change is smooth and orderly or chaotic and painful, is something we can all help decide by our actions today.

— Harry Davitian

Cryogenic Conference

Last week, Brookhaven hosted a Topical Conference sponsored by the International Cryogenic Materials Conference. Arranged by Masaki Suenaga, BNL, and Al Clark, National Bureau of Standards, the conference focused on filamentary A15 superconductors. Some of the conference participants took a tour of the Lab. At the High Voltage Transformer building, Fifth Avenue demonstration site, Bill Harrison, Accelerator, talked about the Power Transmission Project.

Service Awards

The following employees will receive service awards during the month of June.

Twenty-Five Years

James Costanzo.....Reactor

Children's Program

Registration applications for the 1980 Children's Summer Recreation Program may be picked up at the BERA Sales Office between 9:00 a.m. and 1:00 p.m., or at the Recreation Office between 8:30 a.m. and 5:00 p.m.

For information call the Recreation Office, Ext. 2873.

Members of the Eglevsky Ballet Company will fly across the stage at Berkner Hall next month.

The Eglevsky Comes To BNL

Long Island is not only known for a hockey team that performs with verve and skill on ice, but for a ballet company whose grace and artistry on the boards have brought it into the front ranks of regional dance troupes in the United States.

Principal dancers from this exciting group, the Eglevsky Ballet Company, will give a special midsummer performance at Berkner Hall on July 17 at 8:30 p.m.

The company was founded nearly 20 years ago by the Russian-born André Eglevsky, a "danseur noble" who performed with many of the world's major ballet companies. Because of his long association with the outstanding directors and choreographers of his day, he was able to develop a remarkable repertory for his company. And, over the years, these dancers have delighted audiences around the country.

André Eglevsky died in 1977, and Edward Villela, the former star of the New York City Ballet, assumed artistic direction of the company in August 1979. On his appointment, he said that the company's repertory would combine a contemporary ap-

proach to dancing and choreography with 19th century classicism, and stressed that "vitality will be its intrinsic, inherent quality."

Reviews of the company's performances in their first season under Villela's direction have been highly favorable. Newsday's Bob Micklin wrote recently that "if there is a dance company in the New York metropolitan area that has demonstrated more artistic growth in the short space of one season than the Eglevsky Ballet, I'd like to know about it."

Balletomanes will want to get their tickets well in advance to be sure of a chance to see a striking performance by members of this company. Their program will be announced in the *Bulletin* at a later date. Tickets are one price only, \$9, and may be purchased from any of the following:

	Bldg.	Ext.
Jerry Bunce	911	4771
Janet Hoefling	184	2400
Gail Williams	460	3338
Blanche Laskee	185	2873
BERA Sales Office	Berkner Hall	3347

Blue Angels Film

A Navy "Blue Angels" Flight Team film entitled, "Threshold," will be shown at Berkner Hall on Tuesday, June 10 at 7:30 p.m. Tickets will be available at the door: \$2.00 for adults and \$1.00 for children. The BNL Aviation Club is sponsoring this event and has extended an invitation to the public. Tell your friends. Refreshments at intermission.

NYC Train Trip

The Hospitality Committee is planning a group railroad trip to the city on Wednesday, June 18. Departure will be at 7:55 a.m. from the Patchogue LIRR station. Round-trip fare is \$2.45, children under six years ride free.

Reserve a ticket by sending your fare through the U.S. mail to P.O. Box 322, Upton, New York 11973, no later than Thursday June 12. Make checks payable to "Brookhaven National Laboratory." Your tickets will be given to you on the train. Refunds will be made only if cancellations are received by the Friday preceding the scheduled trip.

Volleyball

The season's end volleyball awards party is being planned for Friday, June 20, at 5:00 p.m. in the Recreation Building.

All team members are invited to take part in the festivities, which will include a cold buffet and drinks.

If you have any questions call your team captain, or Ken Sutter, Volleyball Committee Chairman.

Motorcycle Club

The last meeting before our summer break is Monday, June 9 at 5:15 p.m. in the Recreation Building. Let's get together on ideas for warm weather fun.

Bicycling

The BNL Spring Race is "go" for June 8, with registration from 8:30 a.m., the two-lap bunch start at 9:00 a.m., and the single lap, 16 mile time trials at 9:10. The starting point is the BNL North Gate on Wm. Floyd Parkway.

Medallions will be awarded for best time in 6 categories in the time trials: junior (under 16), senior and veteran (40 or over), men and women, and one for best time prediction (no watches allowed). In the bunch start, medallions go to the first three places, men and women, and one for best lap. Since only experienced riders are expected in this event, there are no age categories. In addition, certificates will be sent to all who finish either event.

Bowling

Approximately 200 BNL bowlers and their guests gathered at the Brookhaven Center on May 30 to honor the champions of the various BNL Bowling Leagues. Thanks to the outstanding planning and work by Betty Jellett, Committee Chairwoman, and Dick Larsen, President Bera Bowling Board, this year's party was a huge success.

Applications for next season must be submitted by June 30, and can be obtained from the various league secretaries or at the Bera Sales Office located in the Cafeteria.

Cafeteria Menu

Week Ending June 13, 1980

Monday, June 9	
Chicken rice soup	(cup) .40 (bowl) .50
Batter fried steak & 1 veg.	1.50
Franks & beans	1.35
Hot Deli - Pastrami	(on bread) 1.40 (on roll) 1.50
Tuesday, June 10	
Navy bean soup	(cup) .40 (bowl) .50
Roast chicken w/stuffing & 1 veg.	1.45
Chopped steak & 1 veg.	1.40
Hot Deli - French toasted grilled ham & cheese	1.35
Wednesday, June 11	
Clam & celery soup	(cup) .45 (bowl) .55
Fish & chips	1.40
Saga's homemade lasagna & 1 veg.	1.40
Hot Deli - Philadelphia steak & cheese hoagie	1.50
Thursday, June 12	
Cheese chowder	(cup) .45 (bowl) .55
Chicken pattie parmigiana & 1 veg.	1.45
Corned beef & cabbage	1.45
Hot Deli - Beef taco stroller	1.50
Friday, June 13	
Fish chowder	(cup) .45 (bowl) .55
Beef sukiyaki on toasted Chinese noodles	1.45
Fish cakes w/noodles and cream sauce	1.40
Hot Deli - Hot Italian sausage & pepper hero	(on bread) 1.35 (on roll) 1.45

R/C Aircraft Club

Members are urged to attend a meeting on Thursday, June 12, at noon in room D, Berkner Hall. Among the subjects to be discussed will be another bulk fuel purchase. Also, volunteers are needed to help with the displays and answer questions at the show on June 20. So mark your calendar. For information call Bob Larson, Ext. 4656, Jim Durnan, Ext. 2485, or John Nicoletti, Ext. 4243.

Mountain Club

The Mountain Club will meet on June 10 at 7:30 p.m. in the North Room of the Brookhaven Center. Anyone interested in the Delaware River canoe trip, the weekend of June 21, should attend the meeting.

Softball

League I

Ravens 10 - Blue Jays 8

The Ravens used their big hits to good advantage, while the Blue Jays were satisfied with the singles. LeRoy James was 2 for 2 with a home run plus 2 walks. Dennis Hall had a 2 run homer and Ed Taylor was 3 for 4. Nick Pisco was 4 for 4 for the Jays.

Six Pax 8 - Deegenerates 4

After the first inning the Deegenerates were not able to put an offense together. Meanwhile Brian Briscoe was having a 4 for 4 evening and Ralph Brown had a home run for the Pax.

Phoubars 19 - Source I 10

The Phoubars had their hitting shoes on. Garry Millensen had 4 hits including a home run. "Bucky" Buckman had 3 hits including a home run. Jim Rowehl had a home run.

League II

Titans 28 - Cardinals 3
AMD Bombers 14 - Moles 6
Roga 27 - Dirty Sox 5

League III

Huff & Puff 16 - Brewmasters 14

Outstanding defense by John Reed gave Huff & Puff the victory in a close game.

Brewmasters 8 - Ice Pops 5

A 7 run rally in the 6th inning capped off by a home run by Lon Cannizzo gave the Brewmasters the victory.

Nuke Powers 16 - Huff & Puff 9

Great pitching by Bob Von Hollen was the difference as the Nuke Powers came on strong. A home run by Mel Bonnano put the Nuke Powers ahead to stay.

Big Sticks 31 - Binary Bombers 6

13 runs in the first inning and home runs by Kutchera, Miller, Lettieri and McCafferty helped the Sticks to bomb the Bombers.

Medical 12 - Lights Out 11

A tremendous home run in the 7th inning by John Elmore brought Medical from behind to douse the Lights.

League IV

E-Z Riders 10 - Thrids 5

Larry Musso ended the game with a fantastic play. A great team effort.

Diamonds 13 - Random Sample 4

Home runs by Ken Asselta and Ted Erickson, good hitting by Ellen Gannan and 3 nice fielding plays by Linda Asselta led the Diamonds to victory.

Survivors 22 - Turkeys 6

Bootie Woodson and Ken Sutter had home runs. Jackie Larrie and Ken Sutter went 4 for 4.

League V

Who Cares 18 - Mudville Sluggers 10

No Names 15 - Source III 7

Herbie Harris went 3 for 4; John Hiemczyk went 2 for 4; Debbie Reeves and Mitch Perrier went 2 for 2. Seven runs in the 2nd inning and 5 runs in the 4th led the No Names to their victory.

TNT 25 - No Feedback 10

TNT 10 - Who's On First 6

Bob Larson built this quarter scale biplane. It's modeled after biplanes of the early 1900's. The double wings gave planes of that era extra lift to compensate for low-powered engines. Larson's biplane will be on display at the static show sponsored by the BNL Radio Control Model Aircraft Club on Friday, June 20, at Berkner Hall.

—photo by Humphrey

No Strings Attached

They call themselves Sunday flyers. But although they are not pilots, they fly model planes that are no different from pilot-operated, small aircraft. In fact, members of the BNL Radio Control Model Aircraft Club build and fly planes that have rudders, elevators, ailerons, throttles, and even retractable landing gear.

The seventeen club members hold a variety of jobs around site. What brings them together in this sport is the pleasure of building their own aircraft and the challenge of flying them.

Bob Larson, club president, says that flying these model planes by radio control is quite different from sitting in the pilot seat of a regular aircraft. Since the planes move in all directions relative to the flyer, and have so many controllable features, great skill is required to fly them. Larson estimates that it takes 20 hours to learn basic flying techniques like taking off and landing. Trick flying takes many more hours of practice.

Most club members build their planes out of balsa wood kits. Larson says that a simple kit model takes about 30 hours to build. But since not all designs are available in kit form, some people take the time to build from scratch. Larson has even wired all the electronics himself, although most people buy a radio set ready to install. According to Larson, an average beginner's kit costs about \$30 and the electronics gadgetry costs about \$200. The radios are generally interchangeable among planes.

According to Jim Durnan, vice

president, club members are constantly building new planes. They like to have planes of different designs. But they also build out of necessity, because planes do crash occasionally. Even mid-air collisions sometimes occur. Most of the time, however, crashes are due to mechanical or electrical failures.

The model planes run on a mixture of methanol, castor oil, and nitro methane. Methanol is a fuel and castor oil is a lubricant. Nitro methane adds richness to the mixture for more power and cooler running.

A typical flight lasts about 15 minutes, although some of the really small planes carry only about one-half ounce of fuel and fly only three to four minutes.

Club members fly year round, except when it's raining or snowing. In the dead of winter, they even put skis on their planes so they can take off and land in the snow.

They use a field out in the east end of the Lab site. In good weather, a group of them can be found flying their planes almost every lunch hour.

On Friday, June 20, club members will put on a static show at Berkner Hall, Rooms B and C, from 11 a.m. to 2 p.m. Ten to fifteen planes will be displayed, including a quarter scale biplane and a powered glider. The glider has an eight-foot wing span. Once aloft it's flown on thermal air-currents.

Durnan says that the static show is a good introduction to the sport. Club members will be on hand to answer questions.

Runners' Corner

An overcast, drizzling day presented great running weather for the 258 runners at the annual BNL Spring Roadraces. Justin Gubbins and Bob Moritz led 100 finishers across the line in the 15 km event, setting a new course record of 51:02. The top woman runner, Janice Cross of Port Jefferson, also set a new record running the course in 61:53. Jerry Sbarra (61:32) and Jackie Howe (72:17) were the top BERA male and female finishers.

In the 5 km event, 158 runners turned out. Brian Mangham raced to the overall men's championship in 15:32, while Susan Gill, daughter of Ed Gill (Accel) led all women finishers in 20:03. John Millner (18:51) was the first BERA male to finish. Complete race results will be mailed to all participants and published in the next Runaround.

The BNL runners showed their overall team strength by racing to the Belle Terre Team championship on May 25. The team of Ted Landry (2), Curt Fincher (7), John Ferrero (10), Dick Fuller (17), and John Brodowski (20) bested a strong field including the Gubbins Racing Team. Other

strong BNL finishers on the hilly course were Bill Thomlinson, Jerry Sbarra, Elaine Landry, Ed Gill, Don MacKenzie, Leif Ahrens, Brian Morris and Jack Brennan. Individual trophy winners included the Landrys, Fuller, Brodowski, Brennan and MacKenzie.

In marathon news, 15 BNLers competed in the Newsday Long Island Marathon with Curt Fincher (2:53:04) and Jerry Hastings (2:53:54) leading the way. Many of the BNL runners raced to their best performances:

John Brodowski	3:07:30
Bill Thomlinson	3:16:34
Jerry Sbarra	3:19:00
Sushil Satija	3:24:28
Terry Frei	3:27:00
Dennis Nordstrum	3:40:39
Dave Penoyar	4:01:50
Jim Vaughn	4:08:49
Karen Watts	4:20:03
Ed MacDougall	4:27:54
Jack Baer	4:40:30
Brian Morris	4:57:11
Art Harris	5:10:04

Meanwhile, at the Boston Marathon, Gary Struvz cruised to a 3:03 time under hot, sunny skies.

Placement Notices

The Laboratory's placement policy is to select the best-qualified candidate for an available position, with consideration given to candidates in the following order of priority: (1) present employees within the department, with preference to those within the immediate work group; (2) present employees within the Laboratory as a whole; and (3) outside applicants.

The determination of the best-qualified candidate for available positions will be based upon education, experience and other job-related criteria. Such factors will be evaluated and measured against the demonstrable requirements of the available vacancy, as well as the Laboratory's Affirmative Action objectives.

The Laboratory is committed to a policy of Equal Opportunity in its selection and placement of personnel. Its objective is equality of opportunity in employment, training, and promotion without regard to race, color, religion, national origin, sex, age or handicap.

Each week, the Personnel Office lists new personnel placement requisitions. The purpose of these listings is, first, to provide open placement information on all nonscientific staff positions; second, to give employees an opportunity to request consideration for themselves through Personnel; and, finally, for general recruiting purposes. Because of the priority preference policy stated above, each listing does not necessarily represent an opportunity for all candidates. As a guide to readers, the listings are grouped according to the anticipated area of recruitment, as indicated below. Except when operational needs require otherwise, positions will remain open for one week following publication date.

For further information regarding a placement listing, contact the Personnel Placement Supervisor, Ext. 2882.

OPEN RECRUITMENT: Opportunity for present Laboratory employees and outside applicants.

1368. MEDICAL ASSOCIATE - Requires BS in microbiology or medical technology or equivalent experience in a clinical microbiology laboratory. May be required to work occasional weekend duty. Will work as a technologist in the clinical bacteriology laboratory of the research project. Medical Department.

1369. ENGINEERING ASSOCIATE - Requires MS degree or equivalent in civil or mechanical engineering. Familiarity with reference energy systems construction, basic statistical analysis, and energy data sources is essential. Knowledge of fossil and/or solar energy technologies is desirable. Will work on a variety of regional and international energy assessments for the Regional Studies Group in the National Center for Analysis of Energy Systems. Department of Energy and Environment.

1370. TECHNICIAN POSITION - Involves mechanical testing of materials, preparation and examination of samples, operating of furnaces and pressure vessels. Should also be familiar with the use of electronic equipment and chemicals. AAS degree or experience in metallography is desirable. Department of Nuclear Energy.

1371. REACTOR STANDARDS ENGINEER - BS or equivalent required. Should have reactor operating and management experience as well as experience in the application of nuclear standards (ANS, ANSI, IEEE, RDT), Regulatory Guides and Regulations. Requires excellent technical writing skills. Reactor Division.
